

Improve Patient Outcomes with PPS ANALYTICS

Normalized Integrated Community Evidence

PATIENT IDENTIFICATION & MANAGEMENT WITH CLINICAL & BUSINESS INTELLIGENCE

PPS Analytics (formerly URNICE) specializes in analyzing data from EMR, Practice Management and Dispensing Systems and transforming it into meaningful and actionable insights for Healthcare Providers, Market and Life Science Researchers, Payors, and Policymakers. Gain a deeper understanding of healthcare resource utilization patterns by learning the value and effectiveness of providers, protocols, and variations in care. This data surfaces valuable insights for the right diagnostic and therapeutic interventions for the right patients at the right time, and will drive clinical, operational and financial excellence in independent rheumatology practices.

ABOUT PPS ANALYTICS

Primary Focus

- Capture accurate and complete data
- Analyze and identify gaps in patient care
- Take action to make sure your patients get the right care at the right time
- Measure and monitor patient outcomes

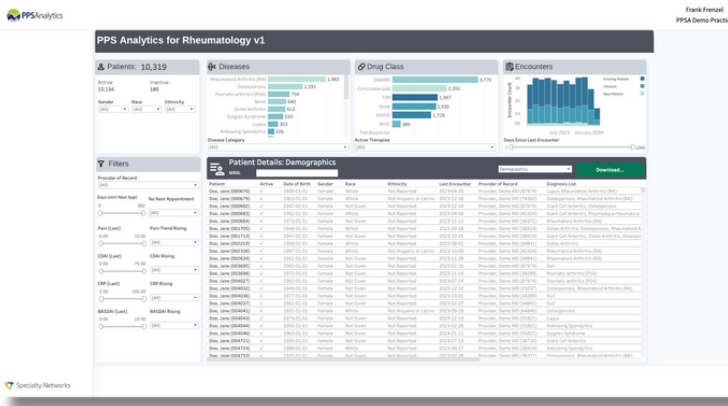

Dashboard Focus

- Financial Optimization
- New Patient Therapy
- Schedule Monitoring
- No Next Appointment
- Community Benchmarking

Users

Data Navigators, Physicians, and Administration

INTERACTIVE DASHBOARDS

PPS ANALYTICS SERVICES

Clinical Analyst Services

Complete patient identification, management support, and detailed reporting for every disease state.

Workflow Optimization

Build practice-specific workflows and optimize the use of PPS Analytics Dashboards in combination with staffing resources for the greatest benefit to patient outcomes and practice revenue cycle management.

Education and Training for Staff, Navigators, and APPs

Detailed disease state workflows, pathway development, and operational assistance while enhancing the provider's opportunity to train.

Integration and Best Practices for Chronic Care Management

Center of Excellence

Achieve clinical, operational and financial outcomes by utilizing community benchmarking to drive your standard of care without disrupting current operations.

Practice Assessment Services

Practice Assessment for Care Gaps, Opportunities, and Implementation Plan
